-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicants' response to the Office Action mailed on October 6, 2005 has been acknowledged. Currently, claims 1-23 are pending and under consideration. Claim 1 is currently amended.

Information Disclosure Statement

2. The information disclosure statement filed October 14, 2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103 of Nelson et al in view of Spence et al are hereby maintained for reasons of the previous office action:

3. Applicant's arguments filed January 6, 2006 have been fully considered but they are not persuasive.

4. Applicant argues that the enrichment channel of Figure 18 is identified as channel 230 and further contends that the channel is clearly upstream from channel 236 which is the first channel is noted but not found to be persuasive.

In response, although the reference of Nelson et al describes the enrichment channel as element 230 in Figure 18 is noted by the examiner. Applicant has amended

Art Unit: 1641

step (b) of claim one to recite that the second channel that contain the particle set is downstream from the first channel; however, the examiner also acknowledges that the enrichment zone taught in the reference of Nelson, which the examiner interprets as applicant's particle-stacking region can be alternatively configured to be positioned in the first **and** the second channels (see Figure 19, #280). Therefore, the second microscale channel containing the particle set would be downstream from the first microscale channel that is fluidly coupled to the first channel as recited in claim 1 step (b).

5. Applicant's argument that the reference of Spence et al does not teach a second microscale channel containing particle sets therein that is downstream from the first microscale channel have been considered but not found persuasive for reasons set forth in the above arguments.

Conclusion

6. No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

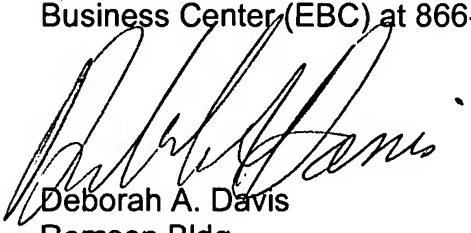

Art Unit: 1641

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
